

Dassault MRO

CABIN INTERIOR

STC **GROSPPOINT**

A new Supplemental Type Certificate (STC)
for the interior upholstery of furniture and
baggage compartments on Dassault Falcon aircraft.

In its ongoing pursuit of excellence, Dassault Aviation Business Services has unveiled a new compliance-approved solution under an EASA STC, revolutionizing the refurbishment process for Falcon interiors.

Featuring Grospoint materials from Tapis Corporation, this solution is a game-changer for interior refurbishment.

Thanks to this certification, DABS can now apply these high-quality materials without the need for additional fire testing— providing an efficient, streamlined, and cost-effective service.

WHAT THIS NEW APPROACH OFFERS

Clients can now easily renovate a wide range of fabric-based components in their Falcons, including:

- **Interior upholstery of furniture** (such as closets, galleys, cabinets, etc.)
- **Baggage compartments**

KEY BENEFITS

Simplification and Accessibility:

The new process simplifies small modifications, making them more accessible. It significantly reduces certification costs by cutting down testing processes by up to 90%, and shortening lead times.

Reliability:

The approach ensures compliance and reliability throughout the refurbishment, eliminating the risk of non-compliance with aviation standards.

APPLICATION

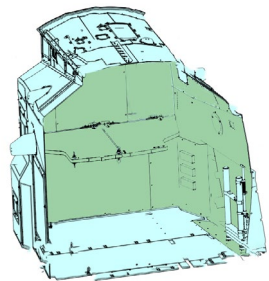

This solution is available for **all Falcon models**, covering the full spectrum from the cockpit to the baggage compartment, including the cabin areas.

CREW CLOSET

GALLEY

BAGGAGE COMPARTMENT
